

# Advancing Health Equity through COVID-19 Vaccination

## Shared Learning Forum

*Mark your calendars for this four-part series, held each Thursday in May from noon-1 p.m.  
Attend all four or choose the sessions that work best for you.*

These forums are open to the statewide network of vaccinators who are working to distribute the vaccine safely, efficiently, and equitably across Wisconsin.

We look forward to engaging with our partners in Local and Tribal Health Departments, Health Care, Pharmacies, Community Health Centers, and Tribal Clinics as well as those in community based organizations.

Each session will feature local vaccinators and their partners sharing experiences, practices and lessons learned for increasing access to and confidence in COVID-19 vaccines.

### Specific Topics Will Include:

- **May 6 from noon-1 p.m.** – Strategies for increasing equitable access to vaccination for disproportionately affected groups.
- **May 13 from noon-1 p.m.** – Partnering with disproportionately affected groups to identify needs and opportunities.
- **May 21 from noon-1 p.m.** – Identifying and removing obstacles and barriers to vaccination through communication and support.
- **May 27 from noon-1 p.m.** – Partnering with trusted messengers to increase vaccine confidence.
