Subject: CheckPoint Update & eCQM Data Entry for PC

Happy New Year CheckPoint Users,

We're excited to announce that the CheckPoint website has undergone a redesign to provide you with a more efficient and user-friendly experience. Here's a summary of the updates we've made to enhance your navigation and access to important resources:

Key Improvements in the Redesign:

1. Streamlined Design for Efficiency

- The banner bar has been removed to simplify navigation and create a smoother user experience.

2. Updated Homepage Layout

- A fresh layout featuring a new style of buttons has been implemented on the homepage. These modern buttons are designed for better usability.

3. CheckPoint Calendar Events

- Also in **Hospital Resources**, you'll find a calendar feature highlighting important CheckPoint events.

eCQM PC Measures are now available for data entry:

New Measure – [ePC-07](#) Severe Obstetric Complications

Measure- [ePC-02](#) Cesarean Birth

When entering, please include data broken down by quarters, please enter for all of 2024:

2024Q1

2024Q2

2024Q3

2024Q4

How to manually enter: Log into CheckPoint>Hospital Administration>Data Entry>select hospital>select year/quarter>enter data per measure

We hope these updates will enhance your experience and make it easier for you to access the information and tools you need.

If you have any questions or feedback about the redesign, please don't hesitate to reach out. Your input is invaluable as we continue improving CheckPoint.

Thank you for your continued support of CheckPoint!

Best regards,
Amber Hollerich
