Subject: CheckPoint Alert - Perinatal Data Entry Reminder for 2022Q2 by 10/1/2022

This is a reminder for hospitals performing birth services to enter perinatal measure data into CheckPoint for **2022Q2** by **10/1/2022**. This will ensure that your hospital is included in the state average and state benchmark calculations. Please use Microsoft Edge as your web browser during data entry so that your data will be saved.

- PeriData.Net (PDN) subscribers will need to enter just their PC-06 (Term Newborn Complications) results from an approved vendor. WHA will load the other measures from the file provided by PDN.
- PeriData.Net subscribers may use data from a different, approved measure vendor if they wish. The PDN data for this quarter will be disregarded if alternative data are entered by the deadline.
- Hospitals using a different, approved measure vendor should enter their data for all four measures (PC-01, 02, 05 and 06).

For your calendar, the 2022Q3 data will be due by 1/5/2023.

Data entry instructions are included below, and please let me know if you have any questions or encounter difficulties. **Users can confirm that data entries were saved** by returning to the Data Entry form and re-select the appropriate Hospital, Year-Quarter and measure(s). If they were successfully saved the data will be visible. *Results will not appear in the Preview Report until WHA completes the data load* and sends an Alert email, approximately one week after the data entry deadline.

Best regards,

Alistair

Alistair Carr, M.S.

Data Entry Instructions

1. **Log-in to CheckPoint** <https://checkpoint.wha.org/> and click **Hospital Login** on the orange menu bar.

CheckPoint delivers reliable reports designed to support health care decisions and assist Wisconsin hospitals with quality improvement activities.

Hospital Report Compare Hospitals Resources **Hospital Login**

2. Click on Data Entry:

Data Entry

Preview Report

3. Pick the hospital and Year/Quarter (you can revise past periods' data this way too):

Perinatal Data Entry

Select a Hospital and Year/Quarter to insert or modify the hospital measure

The screenshot shows a web form for data entry. At the top, there is a header bar with the text "Hospital Report Compare Hospitals". Below this is the title "Perinatal Data Entry" and a sub-instruction "Select a Hospital and Year/Quarter to insert or modify the hospital measure". A horizontal input field is visible, which is currently blurred. Below this field, the text "Select Year/Quarter" is followed by a dropdown menu. The dropdown menu is open, showing a list of options: "Select", "2019 Q1", "2019 Q2", "2019 Q3", "2019 Q4", "2020 Q1", and "2020 Q2". The "2019 Q2" option is highlighted with a light gray background.

- 4. Enter the data for each measure** by clicking the gray section header to expand it (the Newborn Screening Transit Time data are loaded by WHA), selecting your measure data vendor from the list, typing your name as a signature, and entering the numerator and denominator. Click the **<Save Data>** button when you are ready. The **<Review>** button will take you directly to the preview report if you wish to see your new data presented with the prior quarters. NOTE: WHA will advance the preview "window" of four quarters ONLY after the previous one has been released to the public. Your data will not always be viewable in the preview report, but you *can* always return to the data entry form and re-select the hospital and time period.

Select Year/Quarter 2020 Q2
