

## Preparing for Required Hybrid Measures Webinar July 20 - Register Now!

WHA is hosting a webinar presented by Medisolv to share how to prepare for the new hybrid inpatient quality reporting (IQR) program measures. A hybrid measure uses claims data and core clinical data elements from electronic health records for measure calculation. Both readmission and mortality hybrid measures are required beginning this year and will be in a different reporting period than regular electronic clinical quality measures. The hybrid measures performance period started July 1, 2023 and ends June 30, 2024.

### [A Review of IQR Hybrid Measure Requirements webinar](#)

**Thursday, July 20, 2023, Noon - 1 p.m.**

In this session, the two Hybrid Measures now required as a part of the Centers for Medicare & Medicaid Services IQR program will be reviewed, as well as the requirements for each measure and how to prepare for successful submission. The required core clinical data elements and linking variables necessary for submission will also be reviewed.

In this webinar you will learn:

- The regulatory requirements for the hybrid measures
- The data elements associated with the electronic data and why they are important
- How to improve and monitor the core clinical data elements and linking variables

[Register here.](#)

Medisolv also presented on the health equity measures June 29, and shared helpful tables that outline how to meet the requirements in an easy-to-understand format. Find the slide presentation from that webinar [here](#).
