

## Register Now for the 2024 Physician Leadership Development Conference

The WHA 2024 Physician Leadership Development Conference will be held March 15 and 16, 2024 at The American Club in Kohler, WI. Reserve your spot by registering today.

This annual event will again offer timely and relevant content that is applicable to both physician leaders (developing and senior) and non-clinical senior-level hospital or health system administrators or executives.

The hot topic in health care now is artificial intelligence and its intersection with hospitals and health systems. Our keynote presentation is *Artificial Intelligence (AI) in Healthcare: What physician and executive healthcare leaders need to know to manage effectively, stay ahead of technology, and make appropriate decisions*. Nationally recognized expert Dr. Steve Berkowitz will walk the group through a variety of topics including:

- The basic models and concepts of artificial intelligence.
- The implications of specific topics such as emergent properties, hallucinations, brain-computer interfaces, and how they can contribute to AI singularity.
- The impact of GPT technologies, particularly how they would affect the providers and the hospital.
- The overall present and future impact of AI on the basic delivery of patient care.
- The social/moral issues of AI and potential need for regulation.
