

Hello Wisconsin Hospital Association Members,

I am contacting you on behalf of Heroes for Healthcare to inform you the Medical Examining Board has approved the Emergency Rules and posted the Memorandum of Understanding and Licensure Timeline on the DSPS website for the Military Medical Personnel Program. This approval allows Heroes for Healthcare to begin implementing the program, which includes recruiting service members who are transitioning medics, corpsmen, and medical technicians to participate in the program.

Heroes for Healthcare is partnering with Hiring Our Heroes, a national veteran's service organization that organizes job fairs on military bases in United States for employers seeking to hire military talent. In addition to targeted on base recruiting, Heroes plan to schedule virtual visits during the Transition Assistance Training workshops to promote the Military Medical Personnel program, which we reference as Wis-MAC and the benefits of the program for service members seeking employment in civilian healthcare in Wisconsin.

If you would like to learn more about the benefits of the program, please contact me at joyce@heroesforhealthcare.org to schedule a virtual meeting. Attached are copies of the Emergency Rules, MOU, and Licensure Timeline for the program and a Wis-MAC flyer.

Your support is appreciated.
